

Small Plant Nappy Liner

Stock code : PNL500X685

Dimensions: To fit PN500X685

Absorbency: 2Ltr

Net weight: 0.5Kg

The Plant Nappy is designed to replace existing forms of drip trays and is a practical solution to current spill prevention products, allowing fuels and oils to be absorbed into the the base and contain the spillage whilst allowing water to escape contaminate free.

The plant nappy requires no assembly or lengthy training and is ready to offer protection straight out of the bag. What's more the Plant Nappy and Liners are reusable to help keep project costs to a minimum.
