1007039	Astroplast Pull N Open Wipes Dispenser (Each) VOSS
RO4223B	Astroplast Sterile Saline Wipes

DEVICE DESCRIPTION: Sterile Wound Cleansing Wipes can be used on broken skin to properly clean wounds. They have been marketed for the cleansing of minor wounds, such as lacerations achieved by blunt trauma, and abrasions which can be obtained by friction. The wipes are impregnated with 0.9% sodium chloride solutions.

They are a gentle way of cleansing a wound as they do not contain any abrasive agents, or strong-smelling odours. They are ideal for cleansing minor wounds and grazes before a dressing is applied

INTENDED USE:

The Sterile Wound Cleansing Wipes and product family are used as medical device products and have been designed for the care and cleansing of minor external wounds. As clearly indicated on the products marketing and packaging information, these saline wipes are not the sole treatment for minor wounds; rather they must be used in conjunction with other devices and therapies.

PRECAUTIONS:

Re-use of the product increases the risk of infection Sterile unless opened or damaged Store in a cool dry place
INSTRUCTIONS FOR USE: Remove the cleansing wipe from the sachet Clean the wound and dry thoroughly
 Dispose of the wipe after use Apply a dressing or plaster as required

INSTRUCTIONS FOR USE:

Remove the cleansing wipe from the sachet Clean the wound and dry thoroughly Dispose of the wipe after use
 Apply a dressing or plaster as required

STERILISATION: Gamma Radiation

CLASSIFICATION: Class 2a Sterile, according to Rule 4 of Annex IX, MDD/93/42 EEC **STORAGE CONDITIONS:**

Store in a cool, dry place. Stored appropriately, the product has a shelf life of 5 years expiry in intact packaging.

 BP30BDFD35 Boots Sterile Medium Finger Bandage

DEVICE DESCRIPTION:

Sterile First Aid Dressing Bandage is applicable for haemostasis and isolating wound in first-aid.

Example image: 30FBDT16

INTENDED USE:

The Sterile First Aid Dressings are designed to provide a protective barrier for the management of open wounds. The various functions of the dressing include; absorption of bodily wound fluid, providing slight compression to aid haemostasis, providing an optimal environment for wound healing by isolating damaged epithelium from contamination by foreign objects and to reduce the risk of bacterial infection.

CONTRAINdicATIONS:

The Sterile First Aid Dressings are designed to conceal open wounds following trauma thereby excluding further risk of foreign objects, i.e., contaminants such as dirt and debris from entering and subsequently increasing the risk of infection. The dressings are designed to provide an absorbent barrier by which the leakage of blood and exudate of trauma victims can be controlled.

PRECAUTIONS:

The following precautionary measures are advised;

- Do not touch the face of the sterile pad
- Sterile unless opened or damaged
- Single use only

INSTRUCTIONS FOR USE:

- To open the dressing, tear along serrated edge
- Do not touch the face of the sterile pad
- Place over wound and secure in place with bandage
- Re-use of product increases the risk of infection
- Sterile unless opened or damaged
- Store in a cool, dry place

STERILISATION: Gamma Radiation

CLASSIFICATION: Class I Sterile, according to Rule 4 Annex IX, MDD/93/42/EEC.

STORAGE CONDITIONS: Store in a cool dry place. Stored appropriately, the product has a shelf life of 5 years expiry in intact packaging.

Triangular Bandage

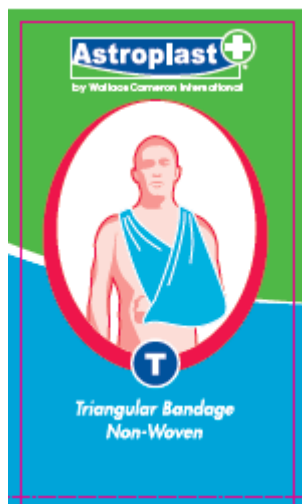

PRODUCT DESCRIPTION: Non-Sterile Triangular Bandage

PRODUCT CODES:

30 BNWT 96	Blue Dot Nonwoven Triangular Bandage
30BCAT95	Blue Dot Calico Hemmed Bandage Triangular 95cm x 95cm x 136cm

Device Description

The burn gel is a water based water-soluble gel that draws heat out of a burn. By applying the burn gel as soon as possible, the heat of the burn is dissipated, helping to prevent the heat from progressing deeper into the skin. The gel consists of 96% purified water and has the same cooling effects as water, the difference from water is the burn gel is thick, it can maintain the burn area keeping cooling and relieve pain, manufactured in various sizes

Intended Use:

(Dressings) 1st and 2nd degree burns, scalds and sunburn. Minimizes trauma and skin damage. Assist moist wound healing, moistens, cools and soothes. Non-adherent & nontoxic.

(Gel) Burns, scalds and sunburn, protection against infection minimises trauma and skin damage. Pain relief promotes healing moistens, cools and soothes. Non-adherent to burned skin non-toxic.

Sterilisation:

The Burn Kool Sterile Hydrogel Burn Dressings/Gel is sterile, single use devices.

Storage Conditions:

Store in a dry cool place, temperature between 0°C-40°C, stored appropriately the product has a shelf life of 5 years.

Component/Material
Function

Emulsified silicone oil 1% CAS 63148-58- 3

Oil

Propylene glycol 4% CAS 57-55-6

Additive to absorb water

Water-soluble azone 1% CAS 59227-89-3

Penetrating agent

Pure water 89% 7732-18-5

Water
